TECHNICAL PROJECTS

[CRUD-Apps] | *[Sole Developer]* | [https://crudapps.tylerw.xyz]
[Collection of Create, Read, Update, & Delete apps to form an interactive social platform]

- Designed and developed multiple CRUD apps to create an interactive social platform
- Utilized BCrypt, JSON Web Tokens, & Cookies for secure authentication in registration, login, & private routes
- Implemented socket.IO and Multer for real-time updates and file upload, respectively
- Leveraged GitHub Actions CICD Pipeline to automate build and deployment on a VPS

[SneakerVerse] | *[Co-Lead Developer]* | [https://sneakerverse.net]
[Proof of concept e-commerce store]

- Implemented PayPal API to achieve functional checkout
- Engineered RESTful back-end routes utilizing Express and MongoDB, with Multer to handle MERN file upload
- Coordinated with another developer to exceed our goal within our two week deadline
- Increased computing capacity and scalability of deployed site by leveraging AWS EC2 web service
